

## Guess Whoo Came to Dinner

Barred Owl

Congaree is home to three species of owls, the Barred Owl, Great Horned Owl, and Eastern Screech Owl. Owls and other bird species produce pellets. These pellets are masses of indigestible material that is later regurgitated. If you find a large quantity of pellets around a tree, it's probably a popular roost. You can even tell what each species is eating by looking at the bones and fur found in the pellet.
